## Key mental

 calculationstrategies in numeracy

FOSSE MEAD<br>PRIMARY ACADEMY

## Leann- Its

Learn- Its are core number fads that are crucial to being able to complete calculations quickly and effectively. To successffully learn the Learn-Its children should practise them in class at a manageable nate erssuring they also pradise the switchers and fact families.

Swithens- these are the inverse. if you know $3 \times 4=12$ then you also know that $12 \div 4=3$ Suitchers line into F att Families where childnen learn a series of cornected number sentences.

## $7+8=15$ <br> $8+7=15$ <br> $15-7=8$ <br> $15-8=7$

## The 36 Addition 'Learn Its'

| + | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ | $\mathbf{5}$ | $\mathbf{6}$ | $\mathbf{7}$ | $\mathbf{8}$ | $\mathbf{9}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\mathbf{2}$ | 4 |  |  |  |  |  |  |  |
| $\mathbf{3}$ | 5 | 6 |  |  |  |  |  |  |
| $\mathbf{4}$ | 6 | 7 | 8 |  |  |  |  |  |
| $\mathbf{5}$ | 7 | 8 | 9 | 10 |  |  |  |  |
| $\mathbf{6}$ | 8 | 9 | 10 | 11 | 12 |  |  |  |
| $\mathbf{7}$ | 9 | 10 | 11 | 12 | 13 | 14 |  |  |
| $\mathbf{8}$ | 10 | 11 | 12 | 13 | 14 | 15 | 16 |  |
| $\mathbf{9}$ | 11 | 12 | 13 | 14 | 15 | 16 | 17 | 18 |

The 36 Multiplication 'Learn Its'

| $\mathbf{x}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ | $\mathbf{5}$ | $\mathbf{6}$ | $\mathbf{7}$ | $\mathbf{8}$ | $\mathbf{9}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\mathbf{2}$ | 4 |  |  |  |  |  |  |  |
| $\mathbf{3}$ | 6 | 9 |  |  |  |  |  |  |
| $\mathbf{4}$ | 8 | 12 | 16 |  |  |  |  |  |
| $\mathbf{5}$ | 10 | 15 | 20 | 25 |  |  |  |  |
| $\mathbf{6}$ | 12 | 18 | 24 | 30 | 36 |  |  |  |
| $\mathbf{7}$ | 14 | 21 | 28 | 35 | 42 | 49 |  |  |
| $\mathbf{8}$ | 16 | 24 | 32 | 40 | 48 | 56 | 64 |  |
| $\mathbf{9}$ | 18 | 27 | 36 | 45 | 54 | 63 | 72 | 81 |

## Foundation stage

| Body Leamn-Its | - 1 hand and $I$ hand $=2$ hands |
| :--- | :--- |
|  | - 5 fingers and 5 fingers $=10$ fingers |$|$| Children can double numbers up to 5 by using fingers on each hand to |
| :--- |
| show them. |

## Year

## Year 2

| Spot doubles and near doubles to add two or three single digit numbers | Using their lenowledge of number bonds, near doubles and doubles, pupils can add a series of one digit numbers. " $3+3+4=10$ because double 3 is 6 and $6+4=10$ " |
| :---: | :---: |
| Panrition to calculate | Can calculate by paritioning with numbers which do not cross the place value boundary $-23+45=? 40+20=60$ and $3+5=8$ then $60+8=68$ |
| Add nine on elever | Pupils can calculate by adding or subtracting 10 then adjusting their answer by adding or subtracting I. |
| Double and half multiples of 10 up to 100 | Children can rapidly recall double and half facts with multiples of 10 |
| Double any number up to 100 by partitioning | Double tens and ones separately then recombine. |

## Yean 3

| Adjust multiples of ten to add then readjust. | $38+68=? \quad 38+70=108 \quad 108-2=106$ |
| :---: | :---: |
| Adjust to make ten then add the rest. | $28+13=30+11$ Childner are introduced to this concept using the idea of calculation strings. |
| Recall nean doubles to numbers under 20 | Calculate using thein knowledge of doubles e.g " $16+18$ is double 16 then add on 2 |
| Double and half numbers to 100 | Use their knowledge of place value as well as doubles and halves to calculate this rapidly. Double 64 is double $60+$ double 4 |
| Multiply and divide by 4 by doubling and hakving twice | $34 \times 4=34 \times 2 \times 2$ |

| Can count on and back in <br> tenths and calculate in tenths | Children can use their place value knowledge to count on then calculate <br> quickly with tenths. |
| :--- | :--- |
| Adjust multiples of 10 on 100 <br> to calculate | $138+69$ ? by $138+70=208 \quad 208-1=207$ |
| Partition decimal numbers to cal- <br> culate | $3.2+2.1=$ ? by $3+2=5 \quad 0.2+0.1=0.3 \quad 5+0.3=5.3$ |
| Near doubles up to 100 | $75+76=$ double 75 plus 1 |

$$
Y_{\text {ear }} 5
$$

| Near doubles with decimals | $2.5+2.6$ is double 2.5 then add 0.1 |
| :--- | :--- |
| Double and half decimal nom <br> bens by partitioning. | Can double and half numbers with up to one decimal place by partitioning <br> - half of 8.4 by halving 8 and halving 0.4 |

Children can use all of their mental calculation methods effectively alongside the written methods to successfully calculate in a range of different contexts.
